SELF-REFERENTIAL APTITUDE TEST, by James Propp (jamespropp at gmaildotcom)

The solution to the following puzzle is unique; in some cases the
knowledge that the solution is unique may actually give you a short-cut
to finding the answer to a particular question. (Thanks to Andy Latto
for bringing this subtlety to my attention.)

I should mention that if you don't agree with me about the answer to #20,
you will get a different solution to the puzzle than the one I had in mind.
But I should also mention that if you don't agree with me about the answer
to #20, you are just plain wrong. :-)

You may now begin work.
